

ASSURED SHORTHOLD TENANCY AGREEMENT

For letting a residential dwelling

Important Notes for Tenants

- This tenancy agreement is a legal and binding contract and the Tenant is responsible for payment of the rent for the entire agreed term. The agreement may not be terminated early unless the agreement contains a break clause, or written permission is obtained from the Landlord.
- The ability to start the tenancy is subject to any current tenant providing vacant possession prior to the start of the Term, the completion of “right to rent” checks, the appropriate payment being made (see the Payment section below) and the satisfactory completion of any outstanding referencing.
- Where there is more than one tenant, all obligations, including those for rent and repairs can be enforced against all of the tenants jointly and against each individually.
- If you are unsure of your obligations under this agreement then you are advised to take independent legal advice before signing.
- If this contract is a “distance contract” as defined in the Consumer Protection (Distance Selling) Regulations 2000, then, subject to the required information having been provided to the Tenant, the 7 day “cooling off” period will cease immediately the provision of the service commences, in accordance with regulation 8(3) of the above regulations. This means that you will be committed to this tenancy once you take on the Property.

- (4.2) The Landlord will return to the Tenant any rent payable for any period during which the property may have been rendered uninhabitable by fire or any other risk against which the Landlord has insured.

The Landlord makes the Tenant aware that as with any residential property, if water is allowed to stagnate within the hot or cold water systems (ie loft cold water tank, shower units, water filters or similar etc), there is a risk of Legionella. To reduce this risk, the Tenant is responsible for taking some simple control measures including regularly cleaning and disinfecting any shower head/s in the Property and where the Property has been vacant for more than a week, outlets from any hot or cold water supply should be 'turned on and allowed to flow' to minimise the stagnation. The Tenant must also report if the hot water is not heating properly or if there are any other problems with the water system, so that a repair can be actioned. As with any residential property, an occupant must only drink water from a mains fed cold water tap ie to only drink from the kitchen tap and not from bathroom taps.

Joint and several liability means that any one of the members of a party can be held responsible for the full rent and other obligations under the agreement if the other members do not fulfil their obligations.

"Reasonable wear and tear" means the gradual reduction in quality and finish that would be expected from normal, careful use, to the extent that would reasonably be expected for that particular item of loose property, furniture, fixture or fitting over the relevant period of time.

A promise by the Tenant not to do something also implies that the Tenant will not allow someone else to do that same thing.

9. The Parties Agree:

- (9.1) Notice is hereby given that possession might be recovered under Ground 1, Schedule 2 of the Housing Act 1988 if applicable. That is that the Landlord used to live in the property as his or her main home, or intends to occupy the property as his or her only or main home.

APPENDIX

Condensation and Ventilation

It is the Tenants responsibility to take adequate precautions to avoid condensation causing damage to the Property and its contents.

Bedrooms, kitchens and bathrooms are the rooms in a Property most susceptible to condensation damage.

- Water vapor created by drying washing indoors, kettles, showering/bathing, cooking and tumble drying **MUST BE ALLOWED TO ESCAPE** from the confines of the room in order to avoid it settling on the coldest wall/window and then turning back into water. This in turn will gradually become black.
- **OPENING A WINDOW IN SUSCEPTIBLE ROOMS FOR NOT LESS THAN 15 MINUTES A DAY WILL ALLOW WATER VAPOUR TO ESCAPE.**

Condensation is generally not the fault of the Property. Please **ENSURE** the following guidelines are followed: -

- Keep the doors closed as much as possible between the kitchen and other rooms and hall whilst cooking, boiling water and washing and drying clothes.
- Keep the kitchen window open even if it is cold outside when you are washing or drying clothes. It is very important to allow moist air to escape to the open air if condensation is to be avoided.
- Always close the bathroom door while the bath is being filled. Running a little cold water into the bath before the hot water is turned on will lessen the amount of steam produced. Ventilate the bathroom by opening a window, if possible, whenever the bathroom is in use and always after the bathroom has been used. If your bathroom has mechanical ventilation, ie. A FAN, ensure that the grills are kept clear.
- If for any reason the kitchen or bathroom doors cannot be kept closed when they are in use, the doors of other rooms and in particular unheated bedrooms should be shut.
- Avoid drying washing indoors as far as possible. If you have a tumble drier always use a ventilation pipe to the outside air, as unvented driers are a major source of condensation.
- Do not hang damp clothing or put wet shoes in cupboards for they will not dry properly and the dampness will encourage mould to grow on them. For the same reason, do not pack clothing tightly in cupboards.
- Good ventilation in your home is important. Try to keep a fanlight (top window) at least partly open in each room.
- Keep your home as warm as you can for the warmer it is, the less likely it will suffer from condensation provided the rooms are adequately ventilated.
- In any dwelling take care that furniture does not touch the walls, because air cannot circulate properly and keep wall surfaces behind free from condensation.
- If the walls of your kitchen or bathroom are painted in gloss paint, condensation will quickly show on them whenever the rooms are in use, but the moisture can be wiped away and it is unlikely to cause mould growth. I however, mould growth should occur on any surface, make sure it is completely killed off by thoroughly cleaning the surfaces with an antiseptic or fungicidal solution. The purpose of cleaning surfaces affected with an antiseptic or fungicidal solution is

to kill any mould spores that may have roots in the plaster under the decorations, for if their roots are not killed, the mould will soon reappear whether or not you have redecorated the walls.

- If you are out during the day, you should try to maintain a safe heating appliance in operation even though it is on a low heat. Otherwise during cold weather when you come in and start cooking, washing and heating the rooms to a comfortable temperature condensation will form very rapidly on the cold surfaces.
